

### **Brin-Vue Insulated Unit Limited Warranty**

During the period of ten years after the date of manufacture, Northwestern Glass Fab warrants that, under normal conditions, there will be no material obstruction of vision on the internal surfaces of the glass caused by failure of the unit's edge seal due to defects in its material or workmanship. This warranty is given by Northwestern Glass Fab only to customers purchasing insulating glass units directly from Northwestern Glass Fab. The ten-year warranty applies only to our standard dual seal rectangular shaped units. Special shaped units are single seal and carry a five-year warranty. The 3/8" thick units do not carry a warranty.

Unit defectiveness caused by glass breakage or other damage is not warranted. This warranty shall be void under any of the following circumstances: units damaged in shipping or handling; units that have not been stored or installed in a Workman like manner; units not installed in strict compliance with GANA Glazing Manual-2004 Edition; units not installed with approved sealants; units installed in sloped glazing; units subjected to abnormal stress resulting from a lack of adequate provisions for expansion and contraction of framing members; units with film or other material applied to its surface; units made with wire, cathedral, or pattern glass; units made with arch or radius tops; replacement units beyond the period covering the original unit warranty.

**Northwestern Glass Fab's liability under this warranty shall be limited to replacement of the units, or at our option, to refund the original purchase price. We shall not be liable for costs of removal or installation of the unit or any other incidental costs incurred in connection with the unit. This warranty is the only warranty made to any person by Northwestern Glass Fab. No person has any authority to alter this warranty.**
